The UK's No.1 Wood-Fired Hot Tub Brand

# Time to relax

---

Our wood-fired hot tubs are made for carefree relaxation and offer a break from the stresses and strains of everyday life.

Step into your very own paradise and allow your body to be soothed and your mind to unwind, combined with the captivating crackle of wood. Perfect enjoyed with your family, on your own or for socialising with friends.

Spoil your body with a healing and invigorating massage. Atmospheric underwater LED lighting will also help you to unwind, turning your spa into an oasis of beautiful colours. When the experience of warmth, bubbles, light and colour is combined with the sweet aromas of wood fire fragrances your Eco Tub will truly offer a sanctuary of relaxation for all the senses.

"We just had our hot tub delivered, it's absolutely amazing, brilliant quick delivery and **amazing customer service**, thank you xx"

# Your very own oasis

## Our range of hot tubs

### The Glyme

2 Person Eco Tub

The ideal tub for those with less space who don't want to compromise on luxury.

Length: 190cm  
Width: 120cm  
Height: 103cm  
Depth: 92cm

### The Burford

5/6 Person Eco Tub

The popular choice for many, The Burford features all of the accessories (and a little more) that most have on their 'wish list' when shopping for their hot tub. Available in both Air Bubble or Hydro (Water) Jet versions.

Diameter: 205cm  
Height: 115cm

### The Kingham

5 Person Eco Tub

A mid-size Eco Tub packed with features and featuring a beautiful circle within a square moulding.

Length: 200cm  
Width: 200cm  
Height: 100cm

## Keeping running costs low

In a time when we must all be conscious of not only the environment but also our products being economical to run, Cotswold Eco Tubs can offer the perfect solution.

Electrically heated hot tubs can cost well in the excess of £10 per day to heat and, due to their sluggish heat up times, need to be powered 24 hours a day, 7 days a week.

At Cotswold Eco Tubs, we recognise that both the luxury of spontaneity & realistic long-term running costs should be integral to our design process.

Our Eco Tubs average at just 1.5 hour heat up\* & require less than £6\* per fuel per evening.

## The Winchcombe

8/9 Person Eco Tub

One of the biggest tubs on the market, perfect for those who like to stretch out. Available in both Air Bubble or Hydro (Water) Jet versions.

Diameter: 225cm  
Height: 108cm

## The Moreton

10 Person Eco Tub

Arguably the most luxury wood burning tub on the market, this spacious tub is designed for those of us who simply want everything.

Length: 225cm  
Width: 225cm  
Height: 108cm

All of our models are available to order in a minimum of six classic colour combinations – ensuring your new Eco Tub will compliment your garden.

The exterior is treated to last for approximately 7 years with no maintenance. It can be re-treated with Danish Oil to help nourish the cladding, or re-stained (in the same way you would your garden fence or other furniture). The freedom to re-stain your Eco Tub will allow it to remain in keeping with your garden for many years to come.

## Staying warm

Once the tub has been heated, the insulated cover (which is provided as standard) improves heat efficiency by 30%.

With the insulated cover replaced, by the following morning you can dip straight back in with a cup of tea! That same evening, the heat up time would only be around 30 minutes.

Delivery in 2 weeks (subject to stock)

# RELAX, REPLENISH, REVIVE

At Cotswold Eco Tubs we understand that for you to invest in your own Eco Tub, our products must be **sustainable**, **convenient** and an **effortless** escape from the pressures of modern life. Here are just a few ways in which your Eco Tub will tick all of those boxes...

## Easy to install

With all our tubs delivered assembled, you can prepare for use within a matter of minutes of delivery. All tubs are palletised and packaged to ensure ease of delivery from our factory to your garden. You'd be amazed at some of the remote locations we have positioned our Eco Tubs.

## Eco friendly

We pride ourselves on being one of the most eco-friendly and luxury hot tub manufacturers within the UK. All our wood cladding for the tubs comes from sustainable sources. The benefit of a wood burning stove, is that wood is a renewable and sustainable fuel source. When wood burns it releases no more CO2 than it would if it were left to rot, which makes this a carbon neutral fuel.

## Swift heat up

With heat up times averaging at an amazing 1.5-2 hours, why would you look at any other option for your hot tub? Electric hot tubs are notorious for taking at least 24 hours to get to temperature, for what may only be a couple of hours use. With our Eco tubs, by simply replacing the lid after use you are able to retain the heat ready for an even quicker heat up time tomorrow.

## Quiet

Enjoy your Cotswold Eco Tub peacefully – our bubble systems are some of the quietest on the market.

## Energy efficient

The wood-fired boiler means that electricity is only required for the use of the Bubble and the LED Light Systems. Meaning a minimal, and optional, usage of electricity and only a low 240v power supply requirement.

## Weather resistant

Regardless of the weather – your Cotswold Eco Tub is built to last. Only the highest quality materials are used in the construction. Our design of robust exterior cladding and fibreglass or acrylic interiors mean many years of reliable service.

"They answered queries over the weekend and were exceptionally helpful and knowledgeable. **They are real enthusiasts and determined to make sure you enjoy their product.**"

### Hygienic

The smooth fibreglass or acrylic interiors are specifically designed for ease of cleaning and allows for only the highest levels of hygiene. Our air bubble system uses push-on fittings and is a dry system so season checks are swift. Our hydro bubble systems are also effortless to clean with the use of our water-treatment starter sachets.

### Comfortable

Designed so that users are in a comfortable, seated position, unlike many competitors that expect you to be seated on the floor. They allow for users to immerse their shoulders without lying down – perfect for enjoying your Eco Tub all year round.

### Stylish

With a range of interior & exterior colour finishes, your Eco Tub will be hand-made just for you. Our sleek insulated covers ensure that even when not in use your Cotswold Eco Tub looks attractive, stylish and at home in any garden or environment.

### Affordable

With our focus firmly on value, we continually strive to offer the best products, advice, and sales support for the best price possible – without ever compromising on quality.

# The Glyme

2 Person Eco Tub

Length: 190cm Width: 120cm

Height: 103cm Depth: 92cm

Water capacity: 700-800L\*

**Power requirement:** 500-700 watt through a standard 13amp 3-pin household plug. No specialist electrics required.

\*This is an approximation – the eco tub with more bathers will require less water and vice versa.

# About us

---

Established in 2017, we are a UK family-owned business with complete customer satisfaction at the heart of all that we do.

We take great pride in our unrivalled combination of luxury design, superior build-quality, excellent customer service & unbeatable prices.

Our wonderful range of Eco Tubs have been specifically designed & adapted over several years to be perfectly suited for the UK & France markets.

We recognise that when purchasing a hot tub there is a lot to consider. We have a strong network of family-owned showrooms throughout the UK & France where our Eco Tubs are available to view alongside friendly, expert advice.

## Honest pricing

Very early on in our company journey, we recognised that many of our competitors just priced on the bare components of a hot tub and that once the essentials (along with the luxuries!) were included the quoted cost spiralled.

We found the hidden costs to be both deceptive and frustrating and we made a commitment to ensure that we always priced our Eco Tubs with a generous package as standard.

# A helpful service for our commercial customers

---

We take great pride in our unrivalled combination of **luxury design, superior build-quality, excellent customer service & unbeatable prices**

## COMMERCIAL CUSTOMERS

Studies find that properties with a hot tub can make up to 154%\* compared to similar properties without.

Wood-fired hot tubs are perfect in a commercial settings as they allow for quick & simple changeovers in-between guests. We receive strong feedback from our commercial customers that their guests respond really positively to wood-fired hot tubs and enjoy the novelty of relaxing in one.

Our tubs help to transform winter occupancy whilst still remaining low maintenance & providing an almost instant return on investment. As all of our tubs have fibreglass or acrylic as standard, cleaning & changeovers remain simple and time-efficient.

\*source: Sykes

## HELPFUL DEALER ADVICE

We are proud to have the strongest network of wood-fired hot tub dealers in the United Kingdom. Our dealers are all well-established family run companies who are just as passionate, knowledgeable & dedicated as we are in helping customers discover the possibilities for their outdoor living area all year-round.

"We purchased our tub after much research when building our holiday let. We could not be more pleased with it and our guests love it. Our occupancy is over 85% all year and I'm confident that a high proportion of that is down to the tub. Aftercare has been amazing and I highly recommend the team at Cotswold Eco Tubs."
